Removal of Swimming Pool/Spa Information

A removed swimming pool or spa is when the entire shell/structure has been completely removed from the property. Consideration needs to be given for the effective removal of the entire shell/structure so as not to impact on any future development on the property.

The remaining excavation should be backfilled in layers with clean sand and compacted in accordance with *Australian Standard 3798-2007 Guidelines on earthworks for commercial and residential developments*.

An Authorised Officer from the Town will be required to conduct a site inspection to confirm the swimming pool / spa has been removed.

By signing this form, I/we declare that the swimming pool or spa has been removed from the above property.
