As previously stated. I would like this trunk and suckers removed. It is a hazard. The many dead limbs pictured within the canopy drop haphazardly and frankly could seriously injure a person within the area. Also pictured is the constant debris this unhealthy, massacred lump of vegetation spews out all over my house.

When this tree was massacred, council should have removed it, not let it survive in this deformed state. Who will be liable when this deformed vegetation damages person or property. I think council.

Who should bare the cost of constant mess left by this deformed vegetation.

4 of these species were removed from Cottesloe primary school, because they were deemed to be a hazard. Those 4 were in much better condition than this deformed specimen.

Regards

Paddy Papalia

Hi Davis as discussed, clearly this tree is unsafe and is a potential time bomb

Kind Regards

Paddy Papalia 0417201112
